1. System Module Outline

PIC: **Pee Yong Qin**	PIC: **Ching Yong Le**	PIC: **Low Jwen Siong**
1. User & Role Management • User CRUD • Role Assignment • Status Control • Profile Editing • Change Password • Student/Staff/Admin AJAX filter, search • Export CSV File • Send user id and password to user via email **2. System Security** • Login, Logout • Cookie Auth • Failed Attempts • OTP • Login Lock • Password Reset (Token) **3. Faculty Management** • Faculty CRUD • Faculty AJAX sort, search	**1. Course Management** • Course(CRUD) • Course AJAX Filter,Search • Course List Export **2. Class/Section Management** • Class/Section (CRUD) • Conflict Detection (Room/Lecturer/Time) • Auto generate class system **3. Tutorial Group Assignment** • Assign student to group • Update All student and group year level and sem using one click • Export **4. Program Management** • Program (CRUD) • Program AJAX Filter by faculty **5. Program Course Management** • Assign Course to program • Remove Course from program	**1. Leave Application** • Leave Submission, Upload MC (Student/Staff) • Approval workflow (Admin) • Track leave history • Leave AJAX search, filter **2. Announcement** • Announcement CRUD • Announcement AJAX filter, search **3. Dashboard** • Admin view system activity like recent enrolled student or recent joined staff • Student Today's Schedule like Upcoming Classes • Student Timetable • Staff **4. Room Management** • Room CRUD • Track Available Room • Room allocation and scheduling • Room AJAX search, filter • Export CSV file

PIC: **Lee Kai Sheng**

1. Classroom Module

- Materials, Assignments - Upload course materials (PDF, PPT, DOCX, images, videos) by teachers.
- Submissions, Comments - Students submit assignments via the system,Support multiple file uploads.
- **Additional Features**
  - Drag-and-drop upload for uploading materials easily.
  - AJAX search/filter for materials by **keyword, type.**

2. Real-Time Chat

- Class Chat, Direct Chat - Chat between teacher and student or between students,Message history saved.
- File Upload
- **Additional Features**
  - Typing status / seen status
  - AJAX search/filter for messages by **keyword or sender**.

3. Feedback & Support

- Submit Ticket - Requests or report issues.
- Reply - Admin can respond.
- Close - Tickets can be marked resolved.
- **Additional Features**
  - AJAX search/filter for tickets by **title**
  - **Ticket Auto-Refresh:** ticket list reloads every 5 minutes

PIC: **Koh Kai Minn**

1. Academic Calendar

- Set start/end date for semesters
- Event manage - Manage public holidays, replacement class and exam periods
- **Additional Features**
  - Using FullCalendar.js to display events
  - drag & drop events on calendar to update dates using AJAX
  - iCal Export - Generate a calendar .ics files

2. Attendance Management

- Mark Attendance - Manual or QR
- Edit Attendance - edit status
- **Additional features**
  - Dynamic QR - Auto rotate QR token (refresh every 120 sec)
  - Flags scans if multiple students use the same device or IP.
  - Display using Chart.js

3. Payment Module

- Generate semester fee invoice for students
- Payment History
- Current Billing - Display unpaid invoices
- **Additional Features**
  - Payment overdue > 7 days the account will be locked (only allowed on Payment tabs)
  - Auto generates PDF receipts & sends via email
  - Send email/push notifications 3 days before due.

4. Notification Module

- User-specific notifications(Student/staff)
- Read/Unread management
- **Additional Features**
  - Navbar notification bell with unread count, AJAX polling updates, relative time display.

2. Entity Class Diagram

3. Monetization Models

We propose the following software monetization models for making our system sustainable:

(A) License (Annual Renewable Licensing)

For a system deployed specifically for a single university, the License model operates as an Annual Renewable License Agreement. Unlike a one-time purchase, this model ensures that the university retains the right to use the software, receive critical security patches, and access server updates on a yearly basis. This model guarantees the sustainability of the system by covering the operational costs of the hosting environment and the continuous maintenance required to keep student data secure. The license effectively acts as a retainer, ensuring the software remains compatible with evolving web standards and browser updates throughout the academic year.

Charging Mechanism: We will charge the university a flat Annual Licensing Fee. This fee is invoiced at the beginning of every year. The fee covers:

1. **Server Hosting Costs:** The cloud infrastructure required to host the database and application.
2. **Security Maintenance:** Regular patching of vulnerabilities to protect sensitive student data.
3. **Software Usage Rights:** Authorization for unlimited staff and student accounts within the single institution.

Revenue Estimate

- **Basis:** The fee is calculated as approximately **20% of the initial system development value** (a standard software industry rate for maintenance).
- **Calculation:** Assuming the initial development value of the system is valued at RM200,000:
    - Annual Fee = RM200,000 × 20% = RM40,000 per year.
- **Total Estimated Annual Revenue: RM40,000**.

(B) Transaction Fees (Payment Processing)

The system includes a financial module allowing students to pay tuition fees, hostel deposits, and library fines online. This model monetizes the convenience of digital payments. By integrating a payment gateway (e.g., FPX or Credit Card processing), the system can capture a small fraction of the funds processed to cover gateway costs and generate profit. This is a "Usage-Based" revenue stream that scales automatically, the more students use the online payment feature instead of queuing at the bursary counter, the higher the revenue.

Charging Mechanism: We will implement a Processing Convenience Fee on every successful transaction made through the portal.

- **Fee Structure:** A flat rate of **RM2.00 per transaction** added to the total bill paid by the student (or absorbed by the university as an operational cost).
- **Scope:** Applied to tuition payments, event ticket purchases, and penalty settlements.

Revenue Estimate

- **Basis:** A university with approximately 5,000 students.
- **Transaction Volume:** We estimate each student makes an average of **4 transactions per year** (2 tuition payments + 2 miscellaneous payments).
- **Calculation:**
    - Total Transactions: 5,000 students × 4 transactions = 20,000 transactions/year.
    - Revenue per Transaction: RM2.00.
    - Formula: 20,000 transactions × RM2.00.
- **Total Estimated Annual Revenue: RM40,000**.

(C) Support (Change Requests & Custom Development)

While the License (Model A) covers keeping the existing system running, university requirements often change. New faculties may open, grading systems may change, or new reports may be needed by the administration. This model monetizes Custom Development and Technical Support for features outside the original scope. This ensures that the system evolves with the university while providing a separate income stream for the development team for their time and expertise.

Charging Mechanism: We will charge the university based on Man-Days for any "Change Request" (CR) issued by the administration.

- **Rate:** A standard professional service rate of **RM800 per man-day** of development work.
- **Process:** When the university requests a new feature (e.g., "Add a QR Code Scanner for the Gym or Add a face recognition for taking an attendance"), a quotation is issued based on the days required to build it.

Revenue Estimate

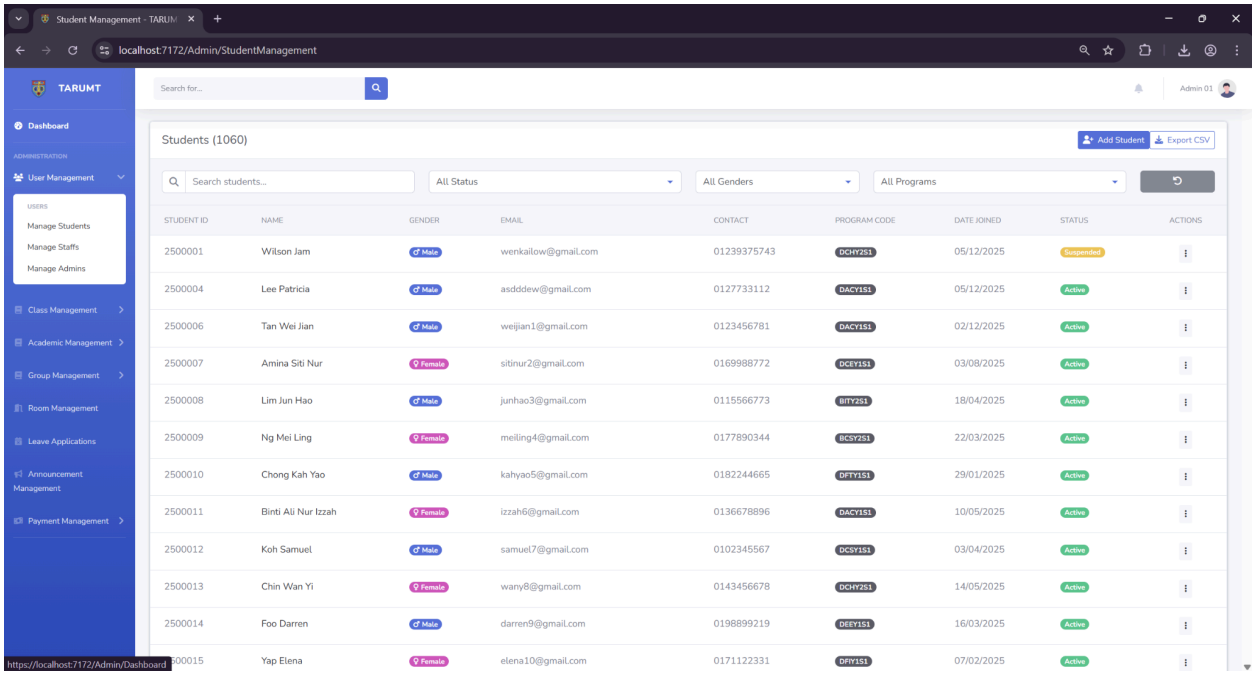

- **Basis:** Universities typically require continuous improvements. We estimate **2 Major Features** and **5 Minor Tweaks** per year.
- **Calculation:**
    - Major Features (e.g., new module): 2 features × 10 days each = 20 days.
    - Minor Tweaks (e.g., report format change): 5 tweaks × 2 days each = 10 days.
    - Total Billable Time: 30 days.
    - Formula: 30 Days × RM800/day.
- **Total Estimated Annual Revenue: RM24,000**.

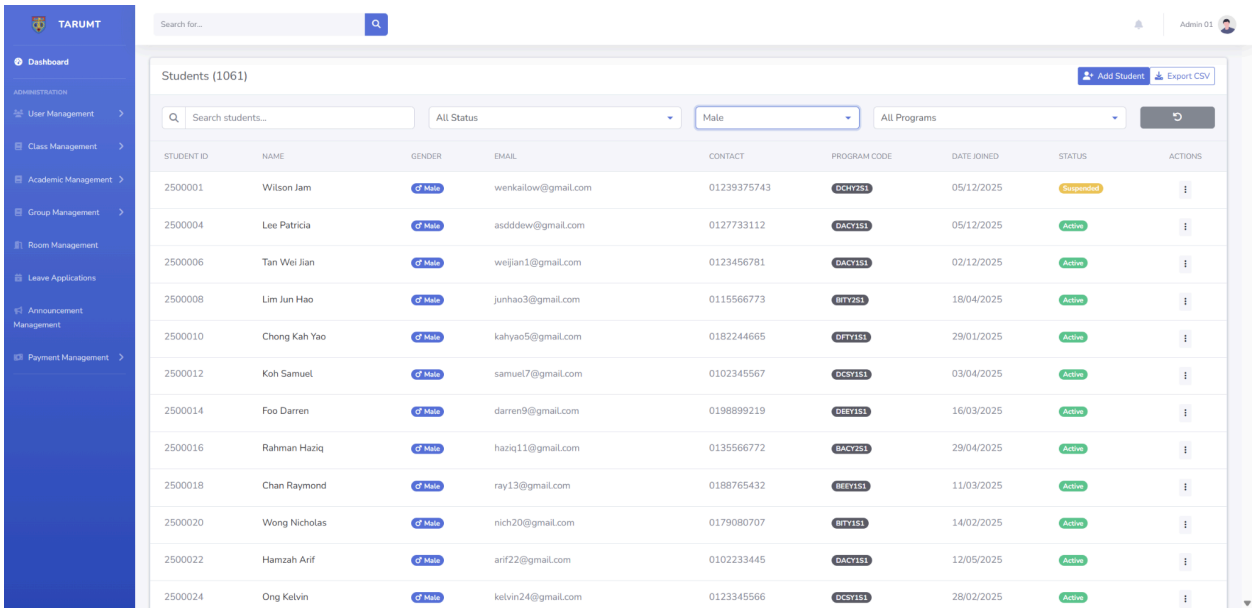

4. System Screenshots
